## PROGRAM

For This Week's Proceedings in the National Congress.

Senate Has Denmark Treaty

And a Number of Other Important Measures That Will Come Up for Consideration.

The House Will Also be Active.

Washington Feb. 17.—The greater part of the day was devoted by the Senate to an effort to ratify the treaty with Denmark for the cession of the Danish West Indies. Thus far there has been no marked evidence of opposition to the treaty but Senator Bacon has indicated a purpose of making an amendment to the agreement. What further discussion may develop remains to be seen.

The consideration of the treaty was concluded Monday its final disposition probably will be postponed to several days, as Senator Lodge has agreed to sidetrack the Philippine bill for the one day. With reference to the Philippine bill it is probable that a vote will be reached during the latter part of the week. The Democrats have been in conference on the subject and have reached the conclusion that they will oppose the bill in a few days. An agreement having been reached, the indications now are that Friday or Saturday next will be the day for deciding the fate of the bill. There are still a few changes to be decided on the part of the Senate and it is expected that the debate will be closed by the end of the week. It is expected that the bill will be passed by the end of the week.

In the House, the bill for the relief of the bankrupts of the United States was taken up. It is expected that the bill will be passed by the end of the week.

From the moment of her arrest she has displayed a calmness that is astonishing in the face of the searching examination made by the police. Her father was formerly a promoter of athletic events and now as an insurance broker, has always earned a good income. He gave his daughter a fairly good education and a comfortable home. ## BILL

For the "Across the Pacific" Cable

Is Reported On

By the Committee on Commerce.

Committee Favors the Passage of the Measure in the House.

Report Sets Forth Argument That Future Peace and Prosperity of the Islands Depends on Our Facilities.

Washington Feb. 17.—The report filed by the house committee on interstate and foreign commerce recommending the passage of the bill introduced by Representative Corlies providing for government ownership of a Pacific cable says that the United States, by the annexation of Hawaii and the acquisition of the Philippines and other islands through the ratification of the Paris treaty, has assumed the responsibility of maintaining peace in the Pacific ocean. This obligation the report, which was prepared by Representative Corlies, author of the bill, says was deliberately undertaken by this country and was approved by the united voice of the people.

It adds: "The future peace and prosperity of these islands will largely depend upon the facilities extended by our government for the advancement and enlightenment of the people there. If we are to continue in control of these islands, the people must be made to understand the character and purpose of our government and to feel the benefits of enlightened civilization and American liberty. This can be accomplished through the medium of cable communication. The advancement of our own people and the benefit of rapid communication through the telephone, telegraph and railway lines illustrate the advantages and the progress that may be achieved through cable messages."

## BRITISH

Were Neatly Caught in a Trap by the Wily Boer Forces.

The Burghers were in Hiding

And a Force of One Hundred and Fifty Britons Chased One Lone Boer to the Top of a Kopje. Casualties were Many.

Pretoria, Feb. 17.—One hundred and fifty mounted infantry while patrolling the Klip river south of Johannesburg, Feb. 12, surrounded a farmhouse where they suspected Boers were in hiding. A single Boer broke away from the house and the British started to pursue him. The Boer climbed a kopje, the British following. Immediately a heavy fire was opened upon them from three sides. The British found themselves in a trap and in a position where they were unable to make any defense. Eight of the British officers made a gallant effort and defended the ridge with carbines and revolvers until they were overpowered. The British had two officers and 10 men killed and several officers and 40 men wounded before the force was able to fall back under cover of a blockhouse.

According to special dispatches from Pretoria the mounted infantrymen were all fresh from home and unused to Boer tactics. The bulk of the casualties occurred during the retreat of the British. The killed included Major Dowell, the commander of the force.

Chilpancingo, State of Guerrero, Feb. 17.—Great alarm still prevails here over the discovery of seven small openings in the mountain between this city and Chilpancingo, from which smoke is issuing, it being feared that the city is in danger of a greater peril than that recently experienced. After an apparently friendly reception from the natives the latter treacherously attacked them during the night, murdering 25 of the party, including Baron Villars, Count de Saint Romy and MM. ized by Natives.****Since Gen. Bell's Drastic  
Measures Have Been  
Inaugurated.****Insurgents Have All Been Rounded  
Up in One Province but Robber  
Bands are Steadily  
Increasing.**

Manila, Feb. 17.—General J. Frank Bell has practically cleaned up the insurrection in Batangas province, the troops under his command having made a clean sweep of the district. It is not believed that all the insurgent arms have been captured or surrendered, but that a number of them have been taken by the insurgents to other provinces or safely hidden.

The increase of robber bands in the provinces of Tayabas and Cavite show the effects of the drastic measures adopted in Batangas and Laguna provinces. General Bell says the people of these latter provinces never realized the terrors of war until they personally experienced its hardships, owing to the closing of the ports and the concentration of the natives in the towns. General Bell believes that the insurgent leader Malvar is becoming exceedingly unpopular with the Filipinos, and that when the natives cease to fear his vengeance many will be found willing to betray him. What has been said of Batangas province applies almost equally to Laguna.

Arrived at Cavite.  
Manila, Feb. 17.—The United States transport Wright, which sank in 15 feet of water Nov. 28 last, by striking an uncharted rock at the entrance of San Jacinto harbor and which was successfully raised this month, has arrived at Cavite in tow of the gunboat Wompatuck. JOHN H. KLATT, Secretary.

There is a certain amount of wealth added to a country every year. That wealth is the product of labor. When that wealth is distributed among all with some regard to equality, all are made in some degree happy. Unfortunately these are not the conditions of today.

Convict labor goods are prohibited from sale unmarked in most states, and as a consequence more than one state prison has adopted the practice of selling the goods which it makes in operation the only system which avoids competition with honest labor by keeping its prisoners at work manufacturing goods for state institutions.

The first congressional election case, involving the right of Representative Rhea, of the third Kentucky district, to sit in the house, has been decided by the election committee in favor of the contestant. Mr. Rhea had but 156 plurality over his Republican opponent, and when party majorities are precarious the counting out process may be always depended upon to afford a larger margin in a count of noses.

The city of Wheeling, W. Va., is beginning to realize the results of the good work done by a thoroughly organized and active board of trade. A number of new and important industries are assured to the city, besides the enlargement of those already in operation. The experience of Wheeling is that of every other city where boards of trade have been at work lending every effort for the upbuilding and the increasing of the number

of industries and the enlarging of others.

One of the arguments in favor of coeducation was that the presence of girls would improve the manners of the boys, who, even at the college age, have not fully emerged from the savage state. A professor at the Northwestern University doubts whether coeducation has had any such effect. Visiting committees to western state universities, especially when physicians have been among the members have reported that the system has stimulated the ambition of many of the girls to such a degree that they are broken down from over-study at an age when moderation is demanded by a highly sensitive nervous system.

### GRAVE OF POCAHONTAS.

Indian Woman Celebrated in History Buried in London.

There is no character in American history about whom so little is known by the average reader of school history as Pocahontas, the celebrated daughter of Powhattan. Romance has been so entwined about the career of this Indian girl that it is difficult to accept the dry facts. However, the latter, when properly presented, are of interest to every one. It is the same with a comedy that is properly presented by competent people, and that is the reason why "The Girl From Chilly," that will be seen in this city in the near future, interests all who see it. All the little details have been carefully looked after with minute care by Leslie Davis, the director, who wonders "Why Mirth is nature's best remedy for ills."

Developes in the Settlement of an Estate

And Judge Miller After a Hearing Has it Under Advisement.

Slate Simmons Who Protests His Innocence Will be the First Prisoner to be Brought to Trial.

Promote Judge Miller has a question of law to decide in the matter of the settlement of the estate of Frederick Bolander which, in its present form, is entirely new. It came up on the application of Ruben Rex, administrator of Frederick Bolander, to sell real estate, which was opposed by one of the children. In presenting the case the defendant's protest was made on the ground that there were no executory debts and for that reason no necessity of the sale.

On the other hand the administrator explained that a claim had been filed in the administrator of S. D. Bolander, a son of Frederick Bolander, who had paid out of his own pocket some of the debts of his father.

The court was made acquainted with the unique situation that S. D. Bolander had been named as executor in his father's will, and at once began to question the facts, without waiting to be legally appointed. He used his own money to pay the debts without resorting to the sale of the deceased's property, and shortly after took his own oath.

The estate is therefore indebted to him for money expended and his administrator filed the claim with Mr. Rex. It now remains with the court to decide whether or not the claim is a valid one, and whether the law will require that A. D. Bolander's estate be entitled to recover. If it is decided it will be necessary to sell the property and as the estate is a small one such a course would have practically nothing for Frederick Bolander's widow.

Quarter of a Million. Perhaps the largest return made in an attachment out in the history of the sheriff's office, was filed today in the case of George H. Moley vs. The St. Marys, Franco-American Petroleum Company. The full description covers several type written pages and the total amount sought is \$225,350.

Slate on Trial. Slate Simmons, who has figured in many a recent case and has made his obnoxiousness before the mayor on numerous occasions, will appear in Common Pleas court tomorrow as the defendant in a state case and endeavor to convince court and jury that he was on no way connected with the burglarizing of Boyd Douglas' grocery. Simmons will be defended by Attorney G. Henderson.

Two Wills Filed. The will of the late David E. Baxter, of Marion township, was filed for probate this morning. The estate, which is a valuable one, consists, among other property, of 193 acres of land, all of which is left to the widow during her life and is then to be divided equally among the children.

The will of Cyrus Conrad, deceased, was probated this morning. The deceased left a wife but no children, and the former receives the small property unconditionally.

Released on Bond. Sanford P. Edsell, the junk dealer, who was indicted for breaking into a Lake Erie car with Fred Slavson and John Ferry and stealing journal brasses, was released this morning, bond in the sum of \$500 being furnished for his appearance on the day of trial.

Court Briefs. Judge Cunningham left for Celina this morning, where he will hold a two days session of court, returning tomorrow morning.

The Children's Friend. There is no use trying to persuade American mothers that a substitute exists for Perry Davis' Painkiller. They know how it relieves the troubles of childhood, from sprained arms and legs to stomachache. Other preparations may do good, Painkiller is certain to. A big difference, and one that has been recognized for sixty years. There is but one Painkiller, Perry Davis.

Billie Robins, 11c at Townsend's.

## TO REST

'Mid Flowers and Tears of Friends

The Remains of Mrs. Harry Bell were Consigned.

Funeral Services Held at the Sadened Home and Conducted by the Pastor of Trinity M. E. Church.

The last sad rites over the remains of Mrs. Sophia Bell, wife of Engineer Harry Bell, were held at the late residence of the deceased, on south West street, at 2 o'clock Saturday afternoon, and the large attendance of friends of the departed and of the bereaved husband was a testimonial more beautiful than words of the love and esteem that was entertained for the estimable young wife and mother whose sudden demise was so severe a shock to many. The services were conducted by the Rev. Mr. Figley, pastor of Trinity M. E. church, and were sad and impressive. Beautiful sacred hymns were sung by a mixed quartette, and at the close of the service at the residence the funeral cortege proceeded to Woodlawn cemetery, where the remains were placed in the receiving vault. The floral offerings that surrounded the casket were as profuse as they were beautiful. The pall bearers were engineer Chas. E. Nutting, J. B. McWhir, and R. B. Hickok, and Messrs. J. J. Studer, J. W. Beall and William D. Waldorf.

## PIQUA

Drumming Up a Crowd for Friday's Game.

On next Friday the Lima High School team will play the local team at the St. George hall. The Lima team is a strictly high school team certified by their superintendent.

Owing to the extra large expenses of this game, the price will be raised to twenty-five cents. The boys want to make enough on their games to give them a good start towards putting a fence around the Ash street grounds. If every one interested in athletics would patronize the games, the necessary money would be in the treasury by the first of April to start the work along.—Piqua Call.

Dress does not make the person. Nor does a clean exterior indicate a clean interior. To be well all organs of the body must work in harmony. Rocky Mountain Tea does this work.

## COFFEEN

Refuses to Come Back With the Sheriff.

Apprehended and Arrested at Marion, Ind.

Is the Man Who Got Away With a Couple of Watches and was Fined by the Mayor.

Among those indicted by the last grand jury, whose names were withheld until such time as their arrest could be made was Earl Coffeen, who is charged with having stolen two watches in this city of sufficient value to send him to the penitentiary. Coffeen was apprehended at Findlay when a search was made for a watch belonging to one of the inmates of a local resort, the officers brought to light one that had been stolen from an old man. The girl's watch had been "soaked". Coffeen was brought here and fined by the mayor, but the grand jury considered the offense worth looking into and Coffeen was indicted.

In the meantime he had left the city and returned to his home in Marion. A warrant was issued for his arrest, but according to a dispatch to the Findlay, the prisoner refused to return to Ohio and is putting the sheriff of Allen county to the trouble of securing registration papers. Coffeen's attorney will, no doubt, endeavor to get the governor of Indiana to refuse the necessary transfer on the ground that Coffeen has once had a hearing and paid a fine for the offense.

## SICKNESS

Caused a Change in Place of Meeting.

The Missionary society of Trinity M. E. church will meet at the parsonage on Wednesday, Feb. 19, instead of with Mrs. Hughes. The change in place of meeting was made on account of sickness.

Worse Than a Blow from the hard frost is the buffet of cold wind upon a pair of improperly protected lungs. A few minutes exposure to cold may be the beginning of consumption. Lose neither time nor courage. Fortify yourself against pulmonary troubles, including consumption, with Allen's Lung Balm. A few doses will loosen the cough and enable you to get rid of the phlegm that produces it. Cure soon follows.

## GORDON

Wants Reservoir Ceded to the State

And Has Introduced a Bill to That Effect

The Standard, Anticipating Such a Result, is Preparing to Get Possession of Valuable Land.

By request of Harry Blatchey, representing the state canal commission of Ohio, Representative Gordon has introduced a bill providing for the ceding to the state of Ohio by the general government 2,000 acres of land lying in the St. Marys reservoir in Mercer county. This is one of the preliminaries incident to the possible abandonment of the canal system of Ohio in accordance with legislation now pending in the general assembly. It must not be understood, however, that Representative Gordon favors such abandonment, for, as a matter of fact, he holds exactly contrary views, at least in respect to the Miami and Erie canal.

There are about 1,800 acres in the St. Marys reservoir, all of which, with the exception of 2,600 acres mentioned in Representative Gordon's bill, already belongs to the state of Ohio. The reservoir, which is the feeder for the Miami and Erie canal, lies in Mercer county, with the exception of about 640 acres. It is the very heart of some of the most valuable oil producing territory in the state, productive wells have been sunk all around its banks. That the land covered by the waters of the reservoir is equally rich in oil does not admit of doubt, and if the public works of the state should be abandoned, it is probable that the reservoir, having been sold in connection with the canals, would be drained so as to permit the sinking of oil wells, whereas now production is only in territory owned by the state, and even there necessarily is confined to the use of floating derricks. Anticipating such a result from the renewed efforts to abandon Ohio public works, the Standard Oil company already is preparing to acquire possession of the reservoir as soon as the state's property goes upon the market.

Nearly all the medicines sold for the cure of throat and lung troubles, colds, coughs, grippe, bronchitis, consumption, catarrhal conditions—and like winter ill, are mainly stimulants and narcotics. Give temporary relief; do no permanent good.

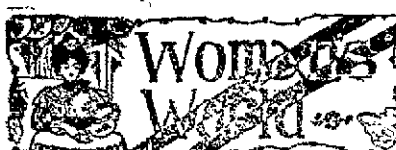

Any of these troubles indicate the weakening of some vital part—a real cure requires something that builds up.

That best something is cod liver oil in the new form—without the grease. That best form of cod liver oil is Hagee's Cordial of Cod Liver Oil (with Hypophosphites of Lime and Soda.)

Hagee's Cordial is best because it contains all the well-known curative and restorative powers of cod liver oil, with the grease left out. Any stomach will take it and retain it.

There is no disagreeable taste, no unpleasant odor, no nausea, when you take Hagee's Cordial. It is a thin fluid, pleasant to taste—every drop of it goes directly to tissue-making, strength-making, health-making, flesh-making.

MARY EMMA WOOLEY.

She is the Youngest Woman College President in the World.

Miss Mary Emma Wooley, who assumed the presidency of Mount Holyoke college, in Massachusetts, at the age of thirty-five years, is the youngest woman college president in the world. Few women have had a more thorough course of educational training than has Miss Wooley. She took a preparatory course of study in the high schools of Providence and Mount Seminary. Then she graduated from Brown and Amherst colleges, winning laurels in every study. She entered Brown university in 1891, when the question of co-education was being agitated, and was one of the first two women to receive its degree of B. A.

During her postgraduate course at Brown she made a special study of his-

tory. She also devoted a large part of her time to languages—Latin, Greek, Hebrew and German—in which she received the degree of Litt. D. and in 1900 L. H. D. at Amherst.

Previous to her presidential appointment she was for five years a member of Wellesley faculty, being the head of the department of Biblical history and literature. When at Wellesley, she took an important part in the administration of college affairs.

Miss Wooley was a pioneer in profiting by the opening of the colleges for the higher education of women and in her own person has demonstrated the success of this movement.

She has always endeavored by her work and literary efforts to promote advanced education for her sex at home and abroad and to that end is one of the most important members of the Rhode Island Society for Collegiate Education for Women.

## The Modern Restless Girl.

There was a time when sweet and twenty used to be considered typical light-heartedness, mirth and innocent merriment. Girls of this age were supposed to have hearts of feather weight; to them all the world was young. A life was clear and bright, everything was novel, and what perhaps was grandest of all was their large and undimmed faith in everybody and everything.

Girls had at all times their faults, of course, though they were no less lovable and sweet and charming on that account, but there seems on the part of the modern girls a tendency to despair and more which their predecessors never displayed. The fault is not altogether theirs. Their mothers are most to blame for it, they in turn being the victims of that spirit of unrest which pervades modern life.

As a matter of fact, the girl of the period is overfed with excitement and, then, like the little boy at the school treat, she cries because she cannot have more. Perpetual change is what she wants. She wants to shirk all the duties that girls of other generations accepted as a matter of course and in which they found rest—the duties, for example, of home life.

The thoughtful mothers must teach their daughters to secure happiness in the simple joys of life at home and in the duties which belong to womanhood.

## Nothing Like a Couch.

A feminine authority on house furnishing has recently delivered herself as follows: "A room without a couch of some sort is only half furnished. When the head throbs and the soul yearns only for endless, dreamless rest, ten minutes' respite on a couch that fits means physical and mental salvation. A comfortable, convenient sofa is a positive means of grace. There isn't a doubt that the need of a nap is often mistaken for a longing to die."

"In nearly every reception or living room, of course, there is an article of furniture that answers to the name of sofa, but it is not worth the space it covers or the time taken to keep it in order, so far as real comfort is concerned. The raison d'être of the two armed velvet tufted yard and a quarter sofa continues to be as much of a mystery to me as the domestic economist's motive in purchasing those lumber legged, carpet faced 45 degree lounges one sees 'marked down' in front of cheap furniture houses. To make a home truly homelike give me the broad, low, hospitable couch, whose very presence is an invitation, a benediction, a delight."

The Use of Peroxide.

Peroxide is antiseptic and healing

its bleaching qualities make it feared

by the average woman. In the hands

of those who are familiar with its vir-

tues and the many uses to which it can

be put it is most excellent. Raw flesh

will heal quickly under its magic

touch, and pimples will disappear

without leaving scars. A weak solu-

tion suitable for toilet purposes can

be purchased by the ounce, but unless

it is kept in a dark colored bottle and

away from the light it loses some of

its power. Some women prefer to buy

it in sealed packages and full strength

and dilute it one-third with water

when using it.

It can be applied to any part of the

skin, but should be kept away from

eyebrows, lashes and hair about the

face because of its bleaching power.

For superfluous hair upon the skin it

can be used with profit, as it takes out

the color by repeated application and

when used often enough will weaken

the hair.

Mistakes in Furnishings.

An error which the inexperienced

house furnisher often makes is to put

two reds of different tones in rooms

that open into each other. A hall, per-

haps, will have terra cotta on the

walls, and there will be red in the din-

ing room to which it leads. This is

wrong. Put a negative color on the

hall, a tone of buff or mastic, with a

small broken figure in self tones, that

there may be no suggestion or strong

contrast to the red of the adjoining

room. If blue is to be used in the din-

ing room, not too light a yellow may

be put on the hall. It is these jarring

arrangements in adjacent rooms that

may destroy wholly an effect in either

apartment that by itself or properly

complemented would be altogether

charming.

Tortured Women.

The married Druse women of Mount

Lebanon, in Asia Minor, labor under a

distinct species of torture endured un-

tached to a long horn or tambour, usu-

ally made of metal, which is fastened

to the head by means of a cushion. These

babars are of an infinite variety of

colors, embellished with tassels, bands

of embroidery and fringes. Underneath

this again is worn a face veil of coarse

thick net so heavily embroidered that

one can scarcely see or breathe through

it. This is fastened close to the face

and the babars drawn tightly over it.

They are so muffled in the folds of

these clumsy stuffs that the stranger

has to look twice before he can decide

whether they are advancing or retreat-

ly under the weight of their veils.

### Couple Narrowly Escapes Death From Coal Gas

Which Filled the Room as They Slept.

Mr. and Mrs. Daniel Rowlands Found Unconscious in Their Bed.

Had Been in That Condition Several Hours When Discovered.—Fortunate Discovery Made by J. B. Lomison.

The venerable Daniel Rowlands and wife who reside on south Main street, had a very narrow escape from death by asphyxiation Saturday morning and they have not yet fully recovered from the effects of their unfortunate experience.

Mr. and Mrs. Rowlands were alone in their home Friday night and Saturday morning one of the neighbors noticed that there was no stir about the house at the usual hour and as the noon hour approached and a dairyman failed to receive any response to a rap at the door a neighbor started to investigate. A door was forced open and both Mr. and Mrs. Rowlands were found lying in bed in an unconscious condition.

Physicians were hastily summoned and after considerable time the patients regained consciousness but were very weak and ill and recovered very slowly. The cause of their condition was soon discovered. They had been burning coal in a magazine stove for heating purposes and before retiring Friday night had filled the magazine but had neglected the damper, which was found closed, consequently the gas that was generated by the coal as it was burned, filled the rooms. About 5 o'clock in the morning Mrs. Rowlands awoke and feeling very

weak and ill, she attempted to get up but did not have sufficient strength to do so, and falling back upon the bed, she soon became unconscious.

A Fortunate Discovery. Saturday night, J. B. Lomison, the grocer at Main and Vine streets, had closed up his place of business and was preparing to retire for the night when he was called upon to wait upon a man and wife who arrived late for their Sunday supply of groceries. He attended to the wants of the couple and was again preparing to retire when he detected the odor of gas and upon investigation he found that the light of several jets that he had left burning in one part of the building had gone out and the gas was escaping into the room where a coal fire was burning. The gas pressure had decreased permitting the lights to go out and had then increased and had Mr. Lomison not been detained by his late customers the result might have been very serious.

### Litigation for the C. L. & M., Is Instituted

By B. C. Faurot in the Supreme Court.

A Case Taken Up from the Circuit to the State Supreme Court.

Mr. Faurot is the Plaintiff in the Action and the Defendants are Quite Numerous. Statement of the Case.

The Supreme court has been called upon to straighten out the financial troubles of the Columbus, Lima and Milwaukee Railway Company, says the Columbus Press-Post, through a suit filed Saturday, in which Benj. C. Faurot is plaintiff against E. H. Norton & Co., and about fifty other defendants. The defendant county circuit court entered a decree against Faurot and he appealed to the case. It appears that he was the promoter of the road which was to be constructed from Floodwood, Athens county, to Columbus and Lima. He purchased materials and issued bonds and succeeded in getting about forty miles of the road built between Lima and Defiance. The Atlantic Trust Company placed a mortgage on the property and bonds were sold amounting to \$500,000 before a receiver took charge of the road. The Lorain Steel Company has a claim against the company amounting to \$125,000. A. Bruon, another, for \$52,800; Flora A. Maholm, \$16,634, besides numerous other creditors. W. J. Dawson, a Cincinnati attorney, who filed the suit in the Supreme court, as the representative of Faurot, has opposed to him for the defendants in error about fifty attorneys and they have thus far made life interesting for him and his clients. Becomes Nickle Plate Agent. Wallace A. McGowan, says the Cincinnati Enquirer, who has been agent of the Red Line at St. Louis, has been appointed agent of the Nickle Plate line at Kansas City, succeeding Mr. Curtis who has been appointed general western agent of the New York, Chicago and St. Louis road, with headquarters at Omaha. Mr. McGowan has a host of friends in Cincinnati, where he was located for many years with the Cincinnati, Hamilton and Dayton road, and later was the representative of the Lake Erie and Western.
